

## vebro project showcase

# Autoglass Repair Centre, Slough, UK

### the challenge

A durable, chemical resistant epoxy coating system was required for a specialist windscreen repair and replacement workshop in Slough, UK.

### meet the client

Autoglass, founded in England in 1972, is vehicle glass repair and replacement company, serving motorists throughout the UK.

With a fleet of just under 1000 technicians offering their mobile services, the company also has a number of specialist centres across the country where additional equipment is available to complete more complex or involved windscreen maintenance jobs.

### the project

The company's 650 m<sup>2</sup> Slough workshop is one of the company's 95 specialist repair centres across the United Kingdom.

The punishing conditions of a facility of this kind call for a durable, wear and chemical resistant flooring solution that is capable of withstanding daily foot and wheeled traffic, as well as oils, adhesives, cleaning agents and other chemicals typically found in automotive workshops.

### key service criteria

Durable & resistant

Low maintenance

Chemical resistant

Easy & quick to install

## vebro's solution

**vebrores** EP HBC was installed at the 650 m<sup>2</sup> Autoglass repair centre in Dusty Grey RAL 7037.

The pigmented, solvent-free, high build epoxy floor coating is specifically designed to provide outstanding protection for concrete substrates in medium duty dry processing areas.

## meet the installer

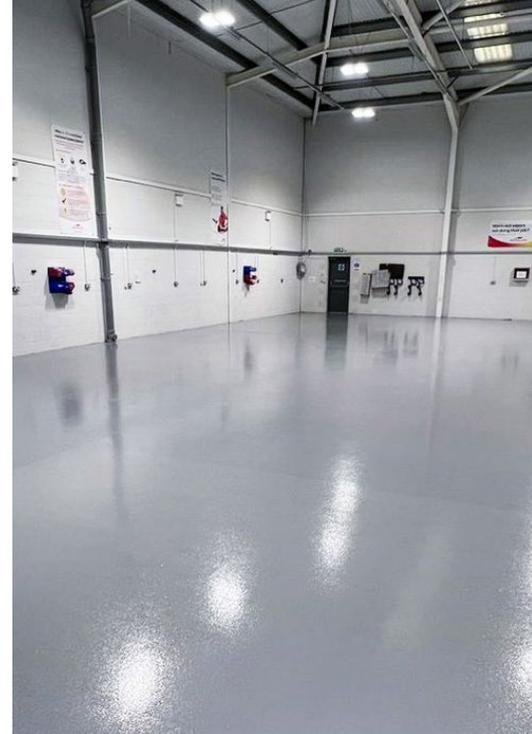

Central Flooring is a specialist installer of high-performance resin flooring systems to the industrial, commercial and sports sectors and is dedicated to providing its customers with guaranteed service and high-quality flooring solutions.

Central Flooring Services aims to provide clients with a bespoke and highly competitive flooring installation service from consultation and specification through to preparation and application.

The abrasion-resistant characteristics of **vebrores** EP HBC ensure that the flooring can endure the rigours of daily operations, standing up to wear and tear over time.

**vebrores** EP HBC demonstrates excellent resistance to cleaning solvents, automotive oils, and other chemicals typically found in repair centres.

Working quickly and efficiently to minimise disruption and downtime the team at Central Flooring Services also offers exceptionally high standards of customer service and after care.
