

vebrocrete HF:

heavy duty, anti-slip,
seamless food grade
polyurethane concrete

vebropolymers

why install **vebro**crete HF?

vebrocrete HF is a heavy-duty, multi-pack, PU (polyurethane) concrete mortar system, designed for use in food and beverage processing and other heavy-industry environments subject to thermal shock & cycling, chemical exposure, and wet process conditions.

Flexible stocking / project management options based on universal resin components

Last minute colour change? Pigment on-site with no-mess, no-waste, dry powder pigment packs

Odourless and virtually dustless when mixing on site

Improved flow even in colder conditions, no LTC version required & no visible trowel lines

Based on European-grade, phthalate-free, sustainable castor oil resins

Reduction in early-stage water-spotting, limited chalky residue on first wash cycles

contact the **vebro** team

We'd love to be your supply partner for your next food & beverage floor installation project, please contact the team.
