

## vebro project showcase

# Paul Ainsworth at No6, Padstow, UK

### the challenge

A durable, slip resistant solution with minimal disruption for a development kitchen area in a popular Michelin star restaurant in Padstow, Cornwall.

### meet the client

Located in a beautiful Georgian townhouse in the heart of bustling Padstow, Paul Ainsworth at No 6 has three dining areas, including private dining for smaller parties as well as a space overlooking the attractive development kitchen.

### the project

Vebro Polymers has teamed up with Resin Floors Telford to deliver fast-cure **vebro**speed Quartz, a high performance yet aesthetically pleasing floor coating system for the development kitchen, an operational space that is also visible to diners.

The area had previously been a functioning kitchen with a less-than suitable pre-existing floor finish that required refurbishment.

### key service criteria

Slip resistant finish

Easily cleaned & maintained

Attractive as well as functional

Robust & durable

Hygienic seamless application & coving

## vebro's solution

Chosen in the blend Starry Night — an attractive yet functional charcoal grey shade, **vebro**speed Quartz has been installed over plyboard designed to level the pre-existing floor finish under a fast turnaround with minimal disruption to the restaurant's operations.

Ideal for areas like kitchens where there is heavy foot traffic and wet spills can easily occur, **vebro**speed Quartz is a highly durable and slip resistant, UV-stable quartz flooring system based on fast-cure MMA (methyl methacrylate) technology.

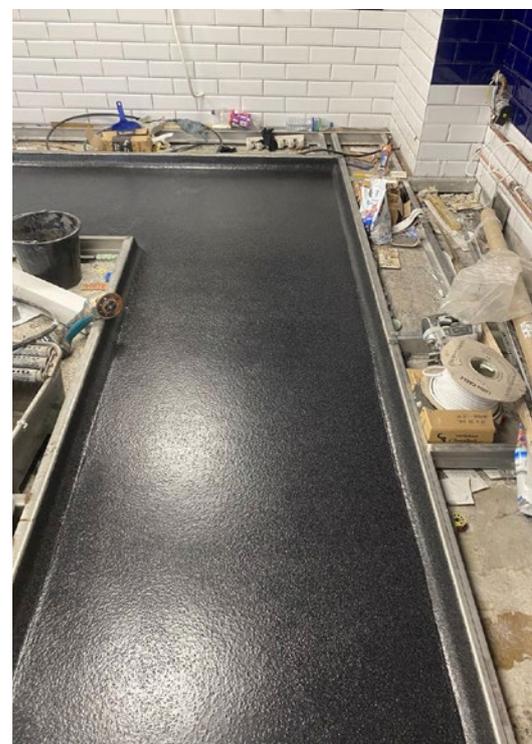

## meet the installer

Resin Floors Telford has over 30 years' experience installing polymer flooring solutions in commercial and industrial facilities, priding themselves on guiding customers through the process from specifying the correct system through to handover and aftercare.

Not only is the installation seamless, unlike alternative kitchen floor coverings such as tiles, coving has also been installed to the perimeter of the floor area, in order to ease cleaning regimes and maximise hygiene.

In most scenarios, **vebro**speed Quartz is ready to walk on in 60 minutes, which is highly advantageous for restaurants like Paul Ainsworth at No 6, where downtime has a direct and immediate impact on turnover.

From heavy-duty industrial coatings and screeds to tough decorative flooring for business properties, Resin Floors Telford installs a wide variety of flooring options and have gained an excellent reputation throughout the UK for their attention to detail and high standards.
