 **FeRFA**

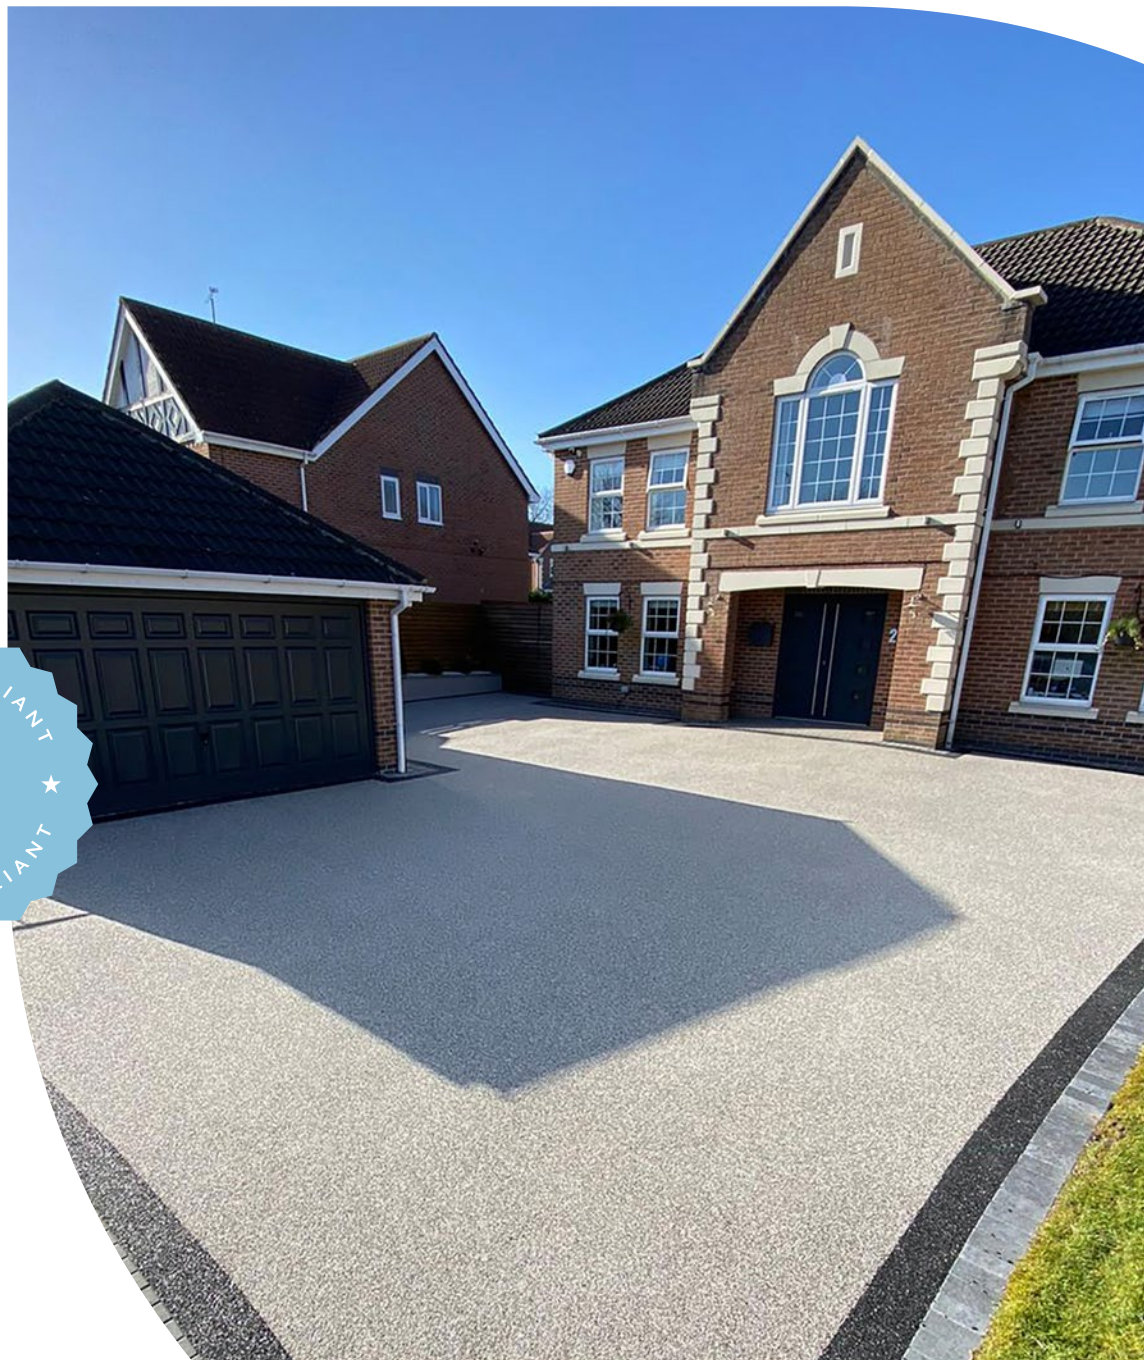

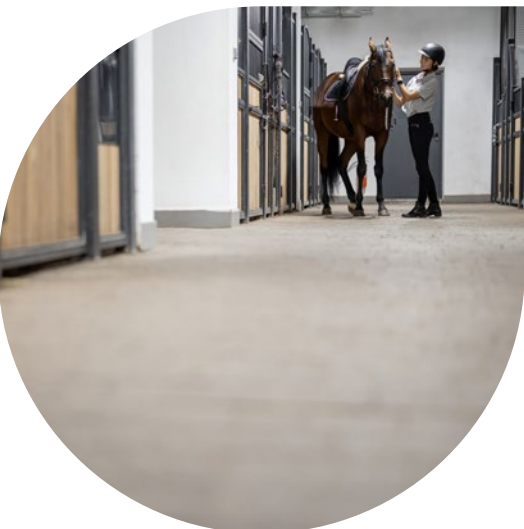

external surfaces: deliver performance, aesthetics & durability

Resin surfacing systems are becoming the material of choice for a growing range of external environments – from pedestrian walkways, driveways and landscaped trails to playgrounds, and public spaces.

With options that include resin bound aggregates, rubber crumb, and mulch, like those in the **vebro**bound range, can be tailored to suit almost any outdoor setting.

These surfaces combine the technical benefits of high-performance resin – durability, permeability, UV stability and slip resistance – with the aesthetic flexibility to work beautifully in both natural and urban environments.

Available in a wide variety of colours, textures and build-ups, outdoor resin systems can be designed to perform in highly specific contexts, while contributing to the overall usability, safety and appeal of external spaces.

key performance benefits

Range of systems designed for car parks, driveways, paths, play areas, sports courts & animal use

Integrates seamlessly in natural or urban spaces; wide range of colours, textures & finishes

Resists wear, weather, impact & UV; built for durability in outdoor, high-use settings

No loose fill or soft spots; easy to maintain with lasting surface performance

SuDS-compliant porous systems control water; reduce pooling, freeze / thaw damage & runoff

Sports court flooring systems offer permanent elasticity and equal ball reflection

Slip-resistant in all conditions; fall-rated & hoof-safe options available where required

Equestrian system available, designed to reduce impact to joints and improve well-being

pedestrian pathways, courtyards & nature trails

Paths and courtyards do more than move people. They guide flow, set rhythm and frame the surrounding landscape. Whether urban or natural, they should feel intuitive, safe and grounded in their setting.

Well-considered surfacing supports all-season movement while reducing erosion, standing water and surface wear.

vebrobound Pedestrian, **vebrobound** Nature Trail and **vebrobound** Mulch deliver a subtle texture underfoot, permeability, and long-term stability, meaning these routes remain walkable, accessible and attractive.

car parks, driveways & drop-off zones

First impressions start underfoot. Car parks, driveways and drop-off areas take the brunt of daily foot and wheeled traffic, as well as whatever the weather brings, but still need to look sharp.

The right surfaces for outdoor spaces – especially those that will experience wheeled traffic – offer high performance without compromising on style.

vebrobound Car Park and **vebrobound** Driveway systems can handle vehicles with ease, drain efficiently in all conditions, and retain a beautiful finish over time.

playgrounds & early years areas

Playgrounds and early years environments call for vibrant, impact-absorbing surfaces that can handle real-world use, while creating an engaging, inspiring impression.

vebrobound Play and **vebrobound** Mulch combine colour, compliance and comfort. Tested and compliant to BS EN 1177, these cushioned systems won't compress over time. The textured finishes provide a safe, slip-resistant surface in all weathers.

systems overview guide

resin bound systems

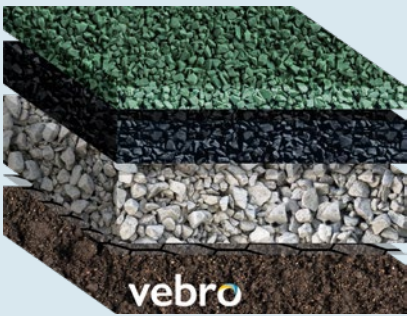

vebrobound Car Park A
A SuDS compliant, PU resin bound surface system suitable for cars and motorcycles.

vebrobound Driveway A
A SuDS compliant, PU resin bound surface system designed for residential driveways.

vebrobound Pedestrian A
A SuDS compliant, PU resin bound surface system designed for terraces, patios & paths.

vebrobound Play R
A SuDS compliant, wet pour PU resin bound surface system designed for playgrounds.

vebrobound Nature Trail*
A SuDS compliant surface system combining rubber crumb & natural stone.

vebrobound Mulch M
A SuDS compliant, wet pour PU resin bound surface system that imitates natural bark.

resin bound finishes available

A decorative aggregate blends

R decorative rubber crumb

M rubber mulch

*vebrobound Nature Trail finishes comprise vebro Decorative Stone in the marked colours and Black vebro Rubber Crumb Granules (Base SBR).

vebro's big promise

Vebro Polymers was founded on a simple service promise to customers, which aims to provide the best **quality**, **agility** and **reliability** in the industry.

global team, local expertise

Founded in the UK, Vebro Polymers has grown, establishing hub HQs and partnerships to serve local markets across the world.

working with vebro is simple

Working with Vebro to find the right flooring solution is straightforward...

First, we review your facility, operational needs, and budget, then provide tailored flooring options that balance performance, lifespan, and cost.

Next, we connect you with an experienced applicator for a full quote on materials, installation, and aftercare.

With Vebro, your floor delivers safety, durability, and compliance for years to come.
